If you or someone in your household is immune-compromised, consult your doctor before fostering since working or living with animals exposes humans to a group of diseases called *zoonoses*. A zoonotic disease is defined as a disease transmitted from animals to humans, and also from humans to animals.

All of the information I have given is true and complete. This foster buddy will reside in my home as a pet. I will provide my foster buddy with quality food, plenty of fresh water, indoor shelter, affection, bring him/her to the vet as needed, bring to the groomer as needed, and regularly contact BBAR with updates as well as pictures and/or videos.

I fully understand that BBAR rescues and works with animals on a daily basis whose background information and histories are widely unknown, making their temperaments unpredictable. I am aware of the various risks and dangers involved in fostering an animal and agree to hold BBAR harmless for any and all injury, or damage to myself and/or my personal property, which may include but are not limited to being bitten and/or scratched. I agree to notify BBAR of any changes in my contact information. I am applying to foster an animal for no one other than myself and agree to contact BBAR if at any time I am unable to care for said animal.
